

# WOMEN

All cast members must put on their own make up base before sitting for the makeup crew.

1. Brush turquoise eye shadow over entire lid extending out towards end of eyebrow. Apply heavy (think "Mimi").
2. Apply a thin line of brown eyeliner just under each eye. Add two "swoops" from corner of each eye towards end of eyebrow.
3. Give eyebrows a nice arch extending the brow beyond the street makeup. If a woman has black brows, use a black pencil.
4. Run the white pencil under the eyebrow and between the two swoops.
5. Have cast member smile and heavily apply blush to the apple of the cheek and back towards hairline by ear.
6. Women should have their own red lipstick and apply on their own. If lower lip is thin, lipstick should be applied beyond lip to enlarge it. Follow natural top lip to include the "bow".
7. Put glue on rim of false eyelashes and let air dry until tacky. Place on closed eye, close to natural lash line. OK to put higher.
